MY OASIS™ RESOURCE CENTER

If your practice is seeking alternative ways to bring vision care solutions that can make a difference to your dry eye sufferers, then OASIS would like to introduce to your practice the MY OASIS Platform.

MY OASIS platform was developed for practices to support the expansion of their services through continuity of care. This automated platform provides a customized storefront, the ability to bridge and engage with your patient community, all while bringing the convenience of at-home delivery on recurring or non-recurring basis. Let the platform tools be your website marketing. Let your practice's key person reach new members and build your vision care/dry eye community, prevent drop off, and bring in supplemental income. MY OASIS cyber platform diversifies your outreach, which broadens your growth potential. It supports communication, connection to nurture relationships, and the ability to gain new actionable insights.

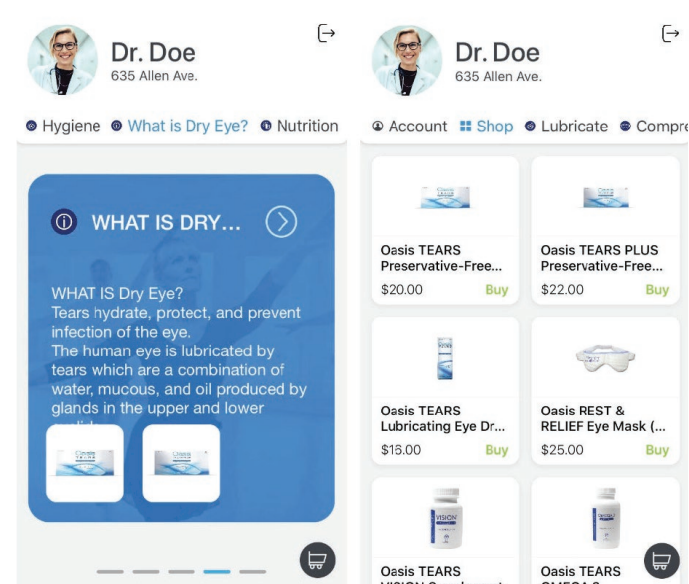

FOR THE DOCTOR, MY OASIS IS:

- A convenient approach to customizing and delivering a daily eye care regimen with OASIS solutions.
- Access to eye care products that make a difference through a custom OASIS® store-front. Invite your members to easily place orders remotely with your unique code (recurring order option available).
- The ability to invite members to learn through the educational information offered covering lubricating eye drops, eye lid hygiene and maintenance, how to use them, and more.
- Access to tools that display your practice's growth, patient retention, and at-home care compliance.

FOR THE CONSUMER/DRY EYE SUFFERER, MY OASIS IS:

- Well being because of access to your at-home care.
- Consumers with dry eye are seeking a vision care provider that is committed to their eye care. MY OASIS puts your practice in the palm of your patient's hand.
- Having a resource center where they can learn about dry eye and educate themselves on their treatment options.
- Convenience of ordering their doctor recommended solutions from home.
- The ease of setting their at-home care on a scheduled shipment.
- The ability to stay up to date on new products and services.

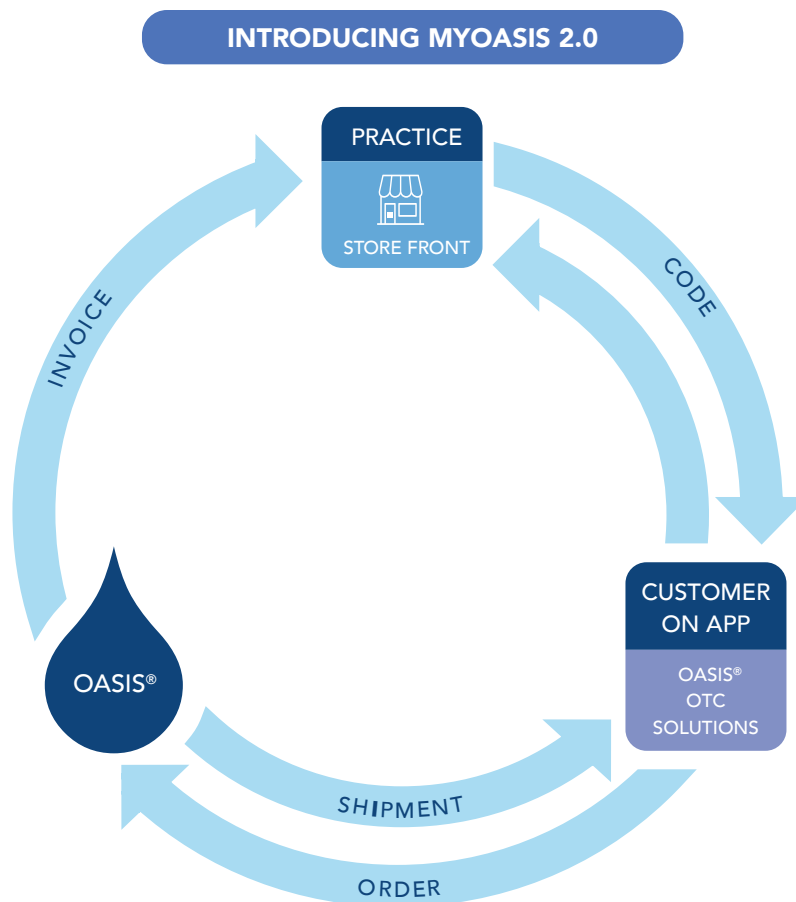

WHAT'S NEXT? MYOASIS 2.0

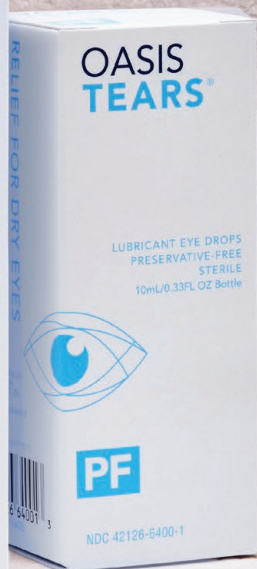

We're excited to announce **myOasis 2.0**, a fully refreshed platform expected to launch in early 2026 — designed with one goal in mind: **to make it even easier to care for your patients and grow your practice.**

Building on everything you love about myOasis, version 2.0 will bring a host of new tools and enhancements, including:

- **A more intuitive provider dashboard** — Get a clearer view of patient activity, recommended products, and key performance insights, all in one place.
- **Streamlined patient product recommendations** — Quickly match patients with the right Oasis products and simplify the purchase path.
- **Improved data and insights** — Access better analytics on patient orders, engagement trends, and follow-up opportunities to strengthen your ongoing care.
- **Enhanced co-branded content and communications** — Deliver personalized reminders and recommendations that keep you top of mind with patients long after they leave your office.
- **Easier patient onboarding** — New tools to help your team introduce myOasis to patients — so they understand the benefits and are ready to order right away.
- **Seamless mobile experience** — A redesigned mobile interface that makes it easy for patients to reorder from any device, anytime.

With myOasis 2.0, you'll stay connected to your patients in a way that feels simple, supportive, and care-focused — helping you grow your business while delivering the best in eye health.

OASIS TEARS®

LUBRICANT EYE DROPS

RELIEF FOR DRY EYES

Oasis TEARS® Lubricant Eye Drops' proprietary formulation soothes, lubricates, and relieves burning, irritation, dryness, and other symptoms related to dry eye. Oasis TEARS® line of dry eye relief products are available through eye care professionals. Oasis TEARS is an over-the-counter lubricant eye drop.

DETAILS

- Dry eye relief
- Moistening, lubrication and comfort
- For use as needed
- 4 treatment options
- Single use containers or multi-use bottle

Ask how Oasis can support your practice with dry eye solutions implementation and staff training.
NOT AVAILABLE FOR EXPORT.

OASIS TEARS

HYPOCHLOROUS®

EYELID CLEANSING SPRAY

RELIEF FOR DRY EYES

Oasis TEARS HYPOCHLOROUS is a gentle, non-toxic and natural antimicrobial formula for use daily on eyelids and lashes. Oasis TEARS HYPOCHLOROUS contains Hypochlorous Acid a known antimicrobial, which serves to inhibit the growth of microorganisms. Hypochlorous Acid cleanses irritated eyelids of bioburden. This natural antimicrobial can be sprayed directly on closed eyelids to soothe them from irritation. The no-rinse spray can air-dry on to manage bioburden.

DETAILS

- Gentle for daily use
- 0.013% Hypochlorous Acid
- Natural Antimicrobial

PUNCTAL OCCLUSION

OASIS FORM FIT[®]

HYDROGEL CANALICULAR PLUGS

LONG TERM OCCLUSION

FORM FIT is truly a one size plug solution. Once inserted into the canaliculus, FORM FIT hydrates in approximately 10 minutes. As it hydrates, FORM FIT increases in size until it completely fills the vertical canalicular cavity.

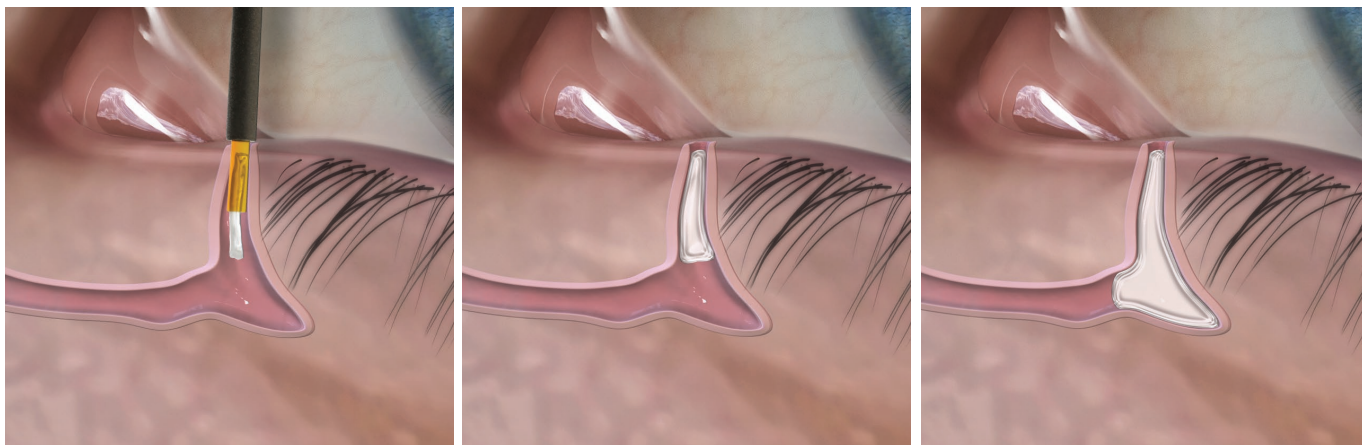

DETAILS

- Hydrates in approximately 10 minutes
- Easily removed via irrigation of the tear duct
- Biocompatible, no foreign body sensation
- Sterile
- Conveniently pre-loaded in inserter
- 0.3mm, one size fits all

REF #	PRODUCT NAME	QTY PER BOX	DIAMETER
6303	FORM FIT Hydrogel Canalicular Plug	10pk	0.3mm
6303-T	FORM FIT Hydrogel Canalicular Plug	2pk	0.3mm

HOW IT WORKS

FORM FIT is made of a safe and biocompatible hydrogel material that expands into a soft, pliable, gelatinous material when it contacts tear film. FORM FIT securely conforms to the vertical canaliculus so there is no need for a cap on the end of the plug. This greatly increases patient comfort and decreases foreign body sensation.

PUNCTAL OCCLUSION

OASIS SOFT PLUG®

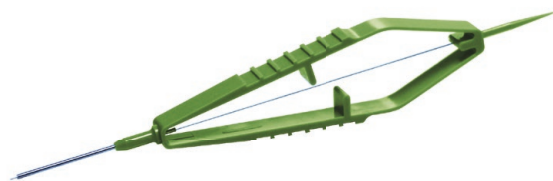

SILICONE PUNCTUM PLUGS

LONG TERM OCCLUSION

The distinctive low-profile cap combined with a softer, flexible silicone maximizes patient comfort. Now available with two inserter options. SOFT PLUG Silicone Punctum Plugs are removable with forceps per instruction for use.

DETAILS

- Pen-Style Inserter with dilator tip - 6pks
- Original Inserter with dilator tip - 2pks, 6pks
- Sterile, preloaded on inserter in 2-pack or 6-pack dispenser box
- Low-profile cap intended to reduce dislocation
- Economy pack includes 20 plugs and two non-sterile inserters. Holders equipped with an alignment slot for quick loading

PUNCTAL OCCLUSION

OASIS SOFT PLUG®

SILICONE PUNCTUM PLUG, FLOW CONTROL

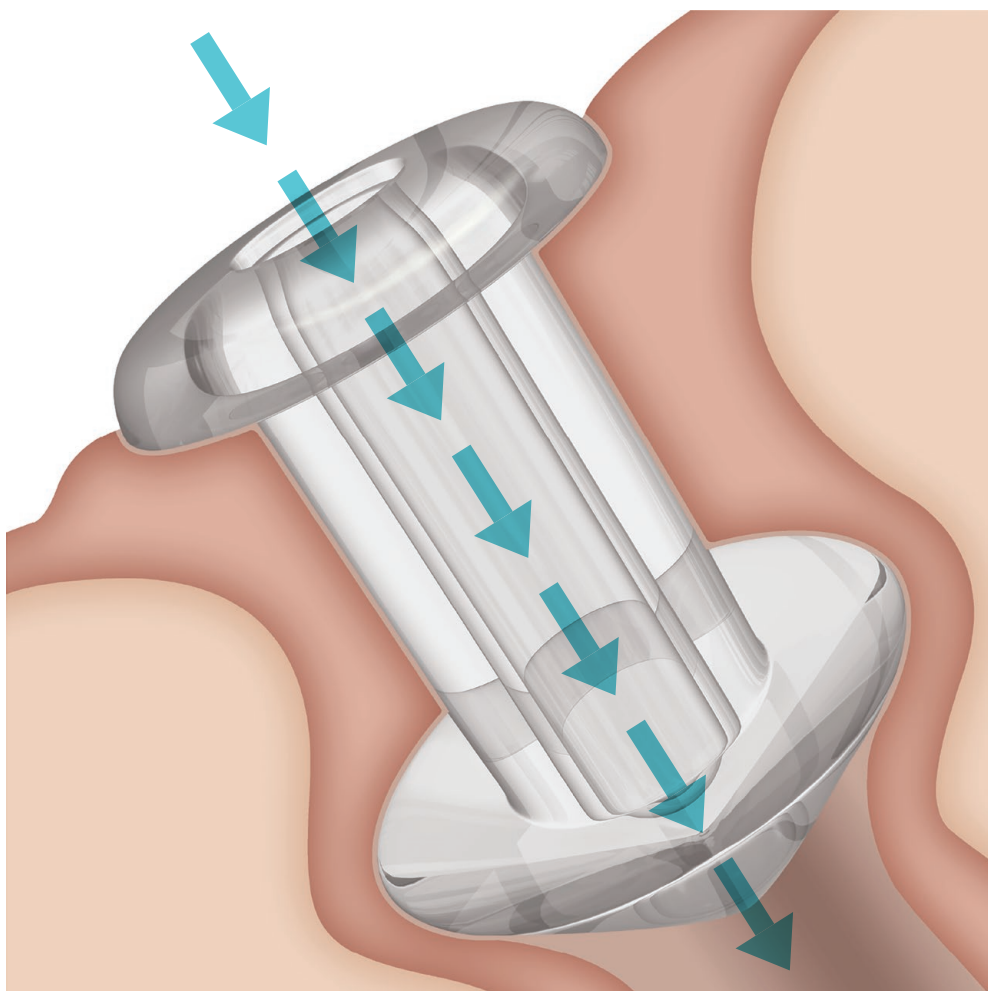

LONG TERM OCCLUSION WITH PARTIAL DRAINAGE

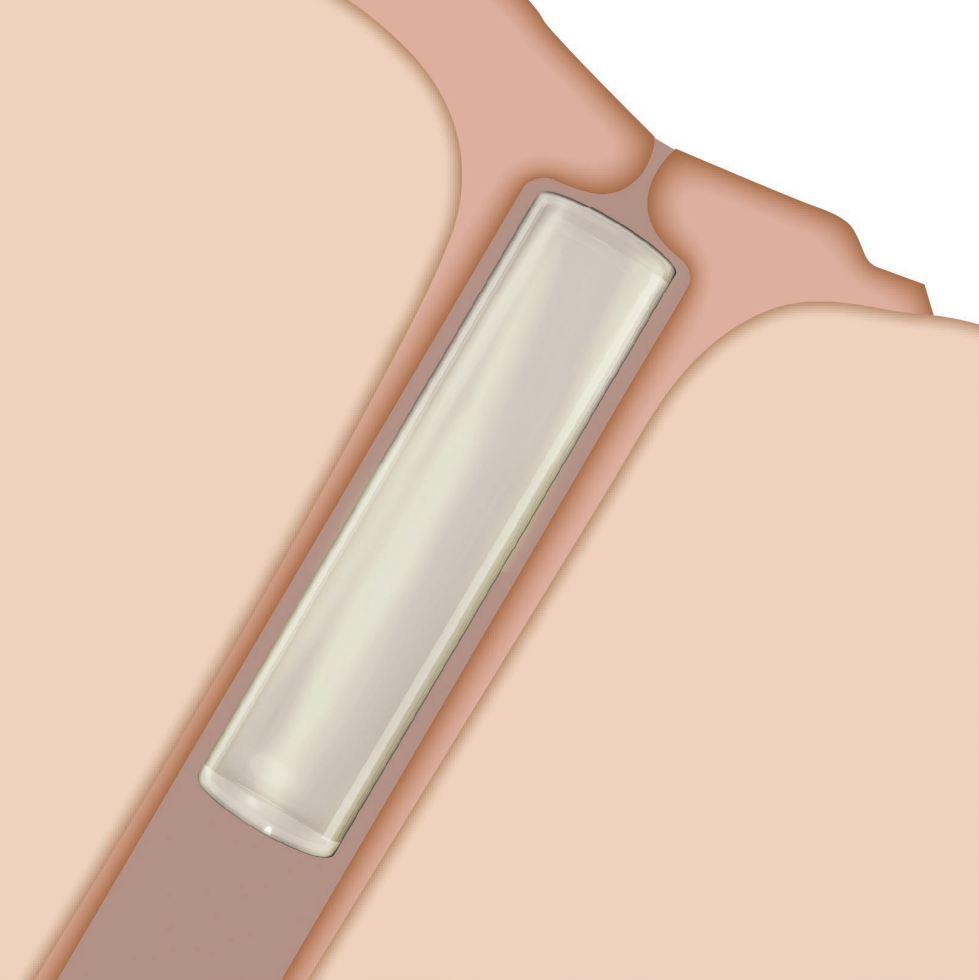

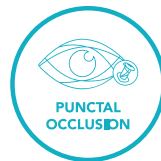

The distinctive low-profile cap combined with a softer, flexible silicone maximizes patient comfort. The inserter minimizes potential for accidental release of the plug. Plug is designed with a center channel allowing for partial tear flow. SOFT PLUG Flow Control Plugs are removable with forceps (per instruction for use).

DETAILS

- Silicone
- Sterile, preloaded on inserter
- For partial occlusion with limited tear drainage

OASIS SOFT PLUG[®]

COLLAGEN INTRACANALICULAR PLUGS

TEMPORARY OCCLUSION

The Collagen Plugs have a smooth proprietary finish that simplifies insertion of the plug. Collagen Plugs are ideal for short-term, diagnostic, and post-surgical occlusion.

DETAILS

- Degradable material lasts 2-5 days
- Proprietary finish simplifies insertion
- Evaluate patient acceptance
- 2mm length
- Sterile
- Insert with forceps

OASIS SOFT PLUG®

EXTENDED DURATION PLUGS

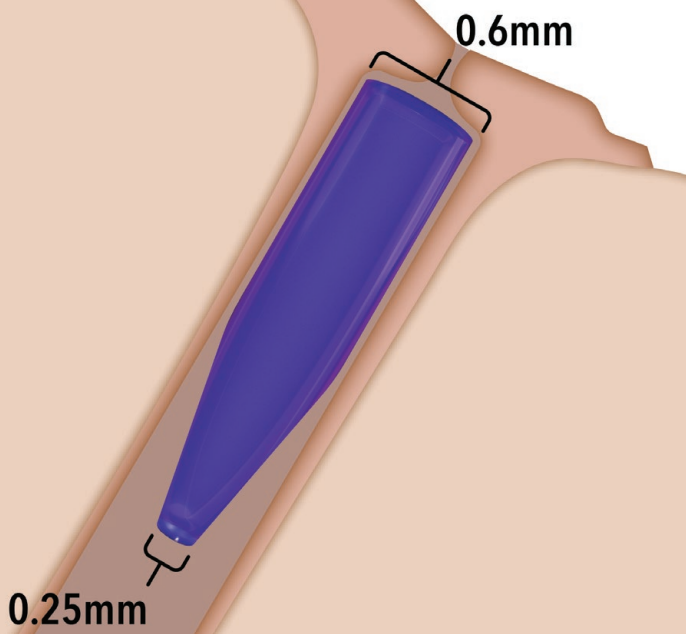

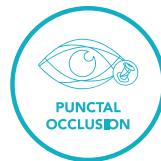

MEDIUM TERM OCCLUSION FOR UP TO 3 OR 6 MONTHS

SOFT PLUG Extended Duration Punctum Plugs are degradable canalicular occluders that are an effective option for transient dry eye symptoms before or after surgery, seasonally, etc. and for patients seeking to experience non-permanent options of punctal occlusion.

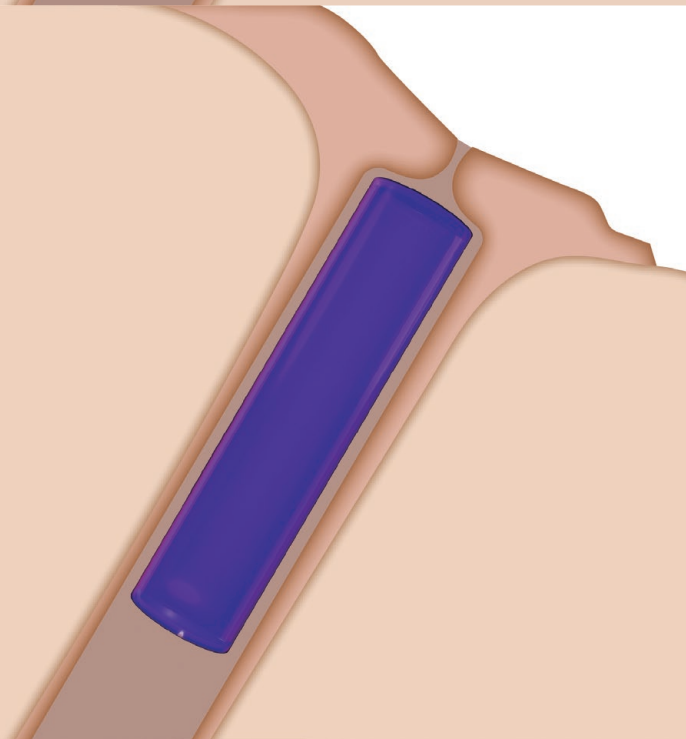

DETAILS

- Pre and post-surgical use
- Sterile
- Insert with forceps
- 2mm length

Instant Relief of DRY EYE SYMPTOMS

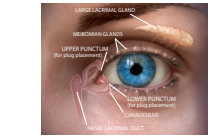

Oasis TEARS®

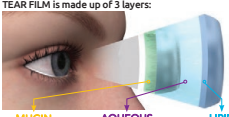

ABOUT TEARS

Tears are essential for keeping your eyes healthy and your vision clear. Tears lubricate your eyes and protect the cornea (outer surface). A lack of tears, improper lubrication or tears draining too quickly can lead to a condition called Dry Eye Syndrome. If not treated, dry eye causes physical discomfort and can affect the quality of your vision.

Tears are produced by the lacrimal glands in the upper and lower eyelids and drain from your eyes through the punctum (tear ducts).

TEAR FILM is made up of 3 layers:

MUCIN (MUCOUS)
Spreads tear film evenly over eye

AQUEOUS (WATER)
Contains water & nutrients

LIPID (OIL)
Prevents tear film evaporation

Normal tear film
Lipids regulate the evaporation of the water layer. The volume and quality of the tear film on the surface of the eye is critical to maintain ocular surface health, duration of comfort and quality of vision.

Abnormal tear film
For a dry eye sufferer an abnormal tear film develops with a reduction of the lipids, water and mucin layers. Areas of dryness form causing surface damage to the eye.

HAVE DRY EYE SYMPTOMS?

It is important that you discuss your symptoms with your Eye Care Professional. Most dry eye symptoms will remain without treatment and affect your quality of vision. Your Eye Care Professional can perform a simple test to determine the severity of your Dry Eye and recommend the best method of treatment.

TREATMENT - OASIS TEARS

Natural tears can be enhanced by using eye drops called ARTIFICIAL TEARS. They supplement the moisture that is missing and lubricate the eyes to temporarily relieve Dry Eye symptoms.

It is important to use a preservative-free drop such as Oasis TEARS®. Most artificial tears contain preservatives which can damage the outer layer of the cornea when using more than 4-6 drops per day.

Oasis TEARS® are a proprietary formulation which keep the tears on the eye surface.

When the eyelid closes, the nature of Oasis TEARS® solution holds glycerin, lipids and water produced naturally, forming a tear film layer.

When the eyelid opens, the Oasis TEARS® solution holds glycerin, lipids and water produced naturally, forming a tear film layer.

HOW GLYCERIN IN OASIS TEARS WORKS

Glycerin interacts with both the water and lipids in tear film and holds them on the corneal surface.

THE PRODUCTS

Oasis TEARS®

Oasis TEARS® products give your dry eyes soothing comfort by moistening and lubricating ocular tissue.

Oasis TEARS® and Oasis TEARS® PLUS are supplied in convenient "take with you" disposable containers. Oasis TEARS® (multidose) and Oasis TEARS® PF come in a 10ml bottle.

Four treatment options offer Dry Eye relief for mild to severe symptoms. Your Eye Care Professional can recommend the appropriate Oasis TEARS® product for your dry eye condition.

- Moistening, lubrication, and comfort
- Instant relief of symptoms
- No blurred vision or foreign body sensation

Description

Oasis TEARS®
Preservative-free Lubricating Eye Drops

Understanding PUNCTAL PLUGS for Dry Eye Relief

InVision Eye Center

WHAT IS DRY EYE?

Tears hydrate, protect, and prevent infection of the eye.

The human eye is lubricated by tears which are a combination of **water, oil, and mucus** produced by glands in the upper and lower eyelids.

A lack of any of these components results in a condition known as **Dry Eye Disease (DED)**.

— 2 Common Types of Dry Eye —

- » **Evaporative** - Lack of lipids in tears and tear film
- » **Aqueous** - Lack of water in tears and tear film

DIAGNOSTICS

Dry eye patients are unique in that their individual case could be related to any combination and number of direct and underlying causes. Helping your eye doctor to narrow down if your dry eye is evaporative or aqueous would be the first step.

If your eye doctor offers a dry eye survey, complete it. Your answers are 50% of the work to determine your diagnosis. Your eye doctor can then determine the tests they may want to run. Here are a few types:

Staining tests - Iisamine green, rose bengal and fluorescein staining show where the mucin is no longer protecting the surface of your eye.

TBUT (Tear Break Up Time) know your TBUT.
This is the time between your last blink and the first spot on your eye to dry under what is called a slit lamp. This is usually performed with a drop of fluorescein dye to clearly identify the dry spot.

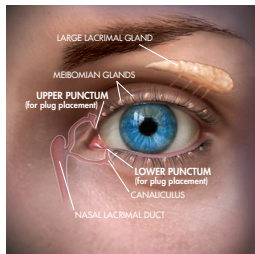

Paper strip and thread tests measure your tear wetting & tear volume.

Other testing - hand-held tear readers.

WHAT ARE PUNCTAL PLUGS?

Once your eye doctor understands what may be triggering your dry eye symptoms, he or she can consider any combination of treatments for effective relief based on your individual dry eye diagnosis. One treatment option could be punctal plugs. Punctal plugs are a dry eye treatment that can be used alone or in combination with a preservative-free lubricant drop. They are smaller than a grain of rice and are placed in the punctum. Tears drain from your eyes through what is called the punctum and the canal below it called the canaliculus. Punctal plugs comfortably seal the drain, or punctum. This allows your own tears to remain on your eyes. For a longer period of time. It is a simple non-invasive procedure done in the eye care provider's practice.

Here are a few punctal plug possibilities to consider asking your doctor about >>>

PUNCTAL PLUGS

Short Term

There are short-term punctal plugs that dissolve in up to 3-5 days.

SOFT PLUG®
COLLAGEN INTRACANALICULAR PLUGS

Medium Term

Medium term, or extended duration punctal plugs dissolve in up to 3 months, or up to 6 months.

SOFT PLUG®
EXTENDED DURATION PLUGS

SOFT PLUG®
EXTENDED DURATION 180 CANALICULAR PLUGS

These dissolvable plugs sit inside the canaliculus below the punctal opening and therefore are not visible. These are often called canalicular or intracanalicular plugs.

Long Term

If a patient prefers that their long-term plugs not be visible, then consider intracanalicular plugs made from hydrogel, a soft gelatinous material. These sit within the canaliculus clear from view.

FORM FIT®
HYDROGEL CANALICULAR PLUG

SOFT PLUG®
SILICONE PUNCTUM PLUGS

The traditional long term silicone punctal plug has a cap and anchor design. The silicone plugs have a slightly visible cap exposed over the punctal opening and an anchor that sits within the canaliculus to prevent, or reduce, the draining of tears.

Punctal plugs come in different sizes so it takes a few minutes for sizing and placement. The long-term silicone and hydrogel plugs are easily removed if necessary.

Your eyes matter. ↑

Ask your doctor. →

LIT-DEP-PB (English)

Once your eye doctor understands what may be triggering your dry eye symptoms, he or she can consider any combination of treatments for effective relief based on your individual dry eye diagnosis. Here are a few possibilities to consider asking your doctor about:

DAILY EYELID & LASH HYGIENE

Start an eye care regimen. Daily hygiene not only applies to your mouth; it also applies to your eyes. Take care of your eyelids and the delicate skin around them by using a hydrating gel cleanser daily. Lids, lashes, and skin are moisturized using gentle cleansers like the eyelid cleansers from OASIS® Medical. Ask your eye doctor where eyelid hygiene may be a benefit.

Oasis LID
& LASH®
+ Tea Tree oil

TIP: Plan a daily eyecare regimen with your doctor

WARM COMPRESS

Warm compresses bring relief to your dry eye because of the loosening of the oils in the Meibomian glands located in and around your lids. These glands are what produce the oils (lipids) that get released with each blink and help to retain the water layer and prevent tear evaporation. Some doctors will recommend holding a warm wash cloth to your closed eye lids, however it may be that the heat doesn't last long enough. There are compresses or soft cloth eye mask filled with beads that conform to your eyes and orbital bones and hold heat along with compression. These eye masks can be used per your doctor's recommendation.

Oasis REST & RELIEF® Eye Mask
(hot & cold)

PUNCTAL PLUGS

Tears drain from your eyes through what is called the puncta and the canal below it called the canaliculus. Punctal plugs comfortably seal the drain, or puncta. This allows your own tears to remain on your eyes for a longer period of time.

Short Term

There are short-term punctal plugs that dissolve in 3-5 days.

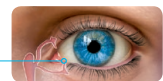

Medium Term

Medium term or extended duration Punctal Plugs dissolve in up to 3 months or up to 6 months.

These dissolvable plugs sit inside the canaliculus and therefore are not visible.

Punctum
(for plug placement)

Long Term

If a patient prefers that their long-term plugs not be visible, then consider plugs made from hydrogel, a soft gelatinous material. These sit within the canaliculus clear from view.

The traditional long term silicone punctal plug has a cap and anchor design. The silicone plugs have a slightly visible cap exposed over the puncta and an anchor that sits within the canaliculus to prevent, or reduce, the draining of tears.

Punctal plugs come in different sizes so it takes a few minutes for placement and they are easily removed if necessary.

PRESERVATIVE-FREE LUBRICANT EYE DROPS

Lubricant eye drops are artificial tears that replace the moisture that is lost on your eyes surface. The viscosity of artificial tears such as Oasis TEARS® PLUS and Oasis TEARS® lubricate the eyes to relieve the gritty dry sensations that cause irritation. Doctors often recommend preservative-free artificial tears such as these. Oasis TEARS® can be used as needed to relieve dry eye symptoms.

RETURN MERCHANDISE AUTHORIZATION (RMA)

Unopened items returned for credit must be accompanied by an RGA (return goods authorization number) and the reason for the return. An RMA can be requested through customer service.

ALLOWANCE SCHEDULE FOR ACCEPTABLE RETURNS	
Sellable merchandise returned in factory condition within 60 days	Full Credit
Sellable merchandise returned in factory condition within 60-90 days	Cost less 40%
Sellable merchandise returned in factory condition 90 days to 1 year	Cost less 60%
Merchandise returned one year after invoice date	No Credit
Merchandise unsuitable for resale	No Credit
Merchandise defective at time of receipt by customer	Full Credit
Merchandise shipped in error	Full Credit

Merchandise that will not be accepted:

- "Special Order" or "Custom Products"
- Merchandise not in standard OASIS® packaging
- Opened products
- Discontinued products

NOTE: Customer must prepay all freight charges on stock returns except for defective material or merchandise shipped in error.

DOMESTIC SHIPPING POLICY

Shipments from OASIS® are FedEx only. Choices are Ground, 3-Day Select, 2-Day, Priority Overnight (by 10:30am) or Standard Overnight (by 4:30pm). Shipping costs will be added when order is placed. Customer's FedEx or UPS account number may be used if provided to Customer Service at time order is placed. We cannot ship to PO boxes. We cannot be responsible for delays in transit. In-stock product orders received before 2pm PST Monday-Friday, excluding holidays, will usually ship on the same business day. Prepayment orders will ship once payment is received. Custom orders will require additional shipment times and will ship when the product is available.
